LOOKING FOR

Engineering manager, product, or contract roles at small companies and startups, especially healthtech and fintech.

SKILLS

LANGUAGES

- PHP
- JavaScript / TypeScript
- Python
- SQL (MySQL)
- HTML5 / CSS3

FRAMEWORKS

- Laravel
- Laminas (Zend), Symfony
- React, React Native
- Vite, Capacitor
- Angular, Vue.js
- WordPress, Magento

PLATFORMS

- AWS, Google Cloud
- Docker, Jenkins
- Stripe Connect and Treasury
- Lago, HubSpot
- Twilio, Vonage, Pusher

PRACTICE

- REST API design
- Microservices

PROFILE

Hands-on senior engineer and team lead with 15+ years of experience building web applications and REST APIs. Most recently at a healthtech startup, I took over an inherited codebase, got it shipping, and owned features from the plan through launch.

Comfortable working with founders, clinical operators, and finance teams, and turning business rules into software. Deep experience with PHP and Laravel, payments and money movement, and HIPAA-regulated data. Looking for a small team where I can take a product vision to market.

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER

WE TREAT I SAN DIEGO, CA I 2025 - 2026

Practice-management software for medspas and aesthetics clinics.

- Took over an inherited Laravel and React codebase (2,600+ contractor commits) after the internal team gained full control, and shipped steadily from September 2025.
- Built the internal clinic onboarding platform on Stripe Connect and Treasury: connected and financial accounts, flow-of-funds agreements, and scheduled payouts. Wrote its three-phase plan.
- Designed a clinician work log so one person can be W-2 and 1099 at the same practice, with a payroll export.
- Built a Lago usage-billing system to unify subscription and per-exam billing, then wrote the reconciliation tooling for moving about 300 clinics' subscriptions to HubSpot.
- Shipped clinical features for a specialty sleep-medicine partner: assessments, consult plans, encounter types, and consents.
- Kept the legacy and new frontends running on one backend through the migration.
- Owned launch tracking (launch plans, QA checklists), wrote executive summaries, a release runbook generator, and the engineering handoff.
- Built an automated, narrated video pipeline that produced 28 product how-to guides.

CONTRACT ENGINEER AND TECHNICAL PARTNER

TELEHEALTH STARTUP I SAN DIEGO, CA I 2026

- Rebuilt a telehealth good-faith-exam platform from scratch for a non-technical founder whose previous developer had disappeared, after reverse-engineering about 55 endpoints from the live app.
- Set up a HIPAA-ready cloud stack with encrypted private databases, least-privilege access, and field-level encryption of patient data.
- Delivered two web portals from one codebase plus an iOS and Android provider app, and acted as the founder's product owner.

- HIPAA safeguards and encryption
- Launch plans and QA
- Code review, unit testing
- Team leadership, mentoring
- AI coding agents

EDUCATION

Bachelor of Science
Computer Science
Kent State University
Kent, OH, May 2006

Studied advanced algorithms.
Kent Inter-Hall Council President.

INTERESTS

Automation, Web Scraping, Online Marketing, Table Tennis

SENIOR SOFTWARE ENGINEER

VOXOX | SAN DIEGO, CA | 2013 - 2025

Recognized for creating a highly scalable micro-services architecture and developing a Robo Call filtering REST API that received over 1 million requests within its first month.

- Led a team of software engineers rebuilding the legacy customer-facing web application from scratch in React Native, with Google authentication.
- Designed and implemented a highly scalable microservices architecture, reducing server costs by 30% and improving system reliability.
- Architected RESTful APIs for a business phone system's calling and text-marketing platform, enabling integration with third-party applications.
- Led the development of a real-time recommendation engine that increased user engagement by 25%.
- Improved code quality through code reviews, unit testing, and automation, resulting in a 50% reduction in bug incidents.
- Led and mentored a cross-functional development team and worked closely with product managers to turn business requirements into technical specifications.

DIGITAL MARKETING CONSULTANT

DMB WEB | SAN DIEGO, CA | 2008 - PRESENT

- Built websites and digital marketing for small businesses, including a city government, a community bank, and a modeling agency.
- Set up SMS marketing, customer management, and automated communication tools for clients.

JAVASCRIPT DEVELOPER

DEALER TIRE | CLEVELAND, OH | 2011 - 2013

- Implemented crucial client-side features for an early-stage single-page application in Backbone.js and Node.js as part of a large scrum-based agile team.
- Built responsive HTML5 and CSS3 across the app using Sass and LESS, and integrated with RESTful APIs.

SENIOR PHP PROGRAMMER

INFORMEDIATE | AKRON, OH | 2010 - 2011

- Helped design and build SourceWare, a PHP enterprise resource planning (ERP) suite covering inventory, order processing, and real-time reporting.
- Developed RESTful APIs for integration with third-party retail platforms.
