SKILLS

- PHP
- JavaScript (ECMAScript)
- Python (Programming Language)
- C (Programming Language)
- Java (Programming Language)
- MySQL
- HTML5
- React Native
- AngularJS
- Vue.js

PROFILE

Senior Engineer with a passion for software development especially with agile practices such as test-driven development and continuous integration with an in-depth knowledge of object-oriented programming software design patterns.

15+ years of software development experience with proven success in engineering customized solutions that improve business processes, operations, scalability, and profitability. Expert in full System Development Life Cycle (SDLC) of web-based applications including high transactional enterprise e-commerce applications.

Understands and transforms complex business requirements into software, ensuring applications are delivered on time, to specification, scalable, performance-optimized, and maintainable. Proven ability to estimate, prototype, test, and deploy client/server applications with team leadership and mentoring experience.

A highly motivated individual who is always learning, able to work to tight deadlines, and who can communicate effectively with technical peers as well as business users. Someone who encourages learning and the sharing of ideas and is always open to new ways of working.

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER

VOXOX | SAN DIEGO, CA | 2013 - PRESENT

Recognized for creating a highly scalable micro-services architecture and developing a cutting-edge Robo Call filtering REST API that received over 1 million requests within its first month.

- Led the development of a robust communication and cloud services platform, enhancing reliability, scalability, and user experience.
- Designed and implemented a highly scalable microservices architecture, reducing server costs by 30% and improving system reliability.
- Developed a cutting-edge Robo Call filtering REST API that received over 1 million requests within the first month of release.
- Architected and implemented RESTful APIs to support communication services, enabling seamless integration with third-party applications and driving business growth.
- Collaborated closely with product managers to translate business requirements into technical specifications.
- Led the development of a real-time recommendation engine that increased user engagement by 25% and generated millions in additional revenue.
- Led and mentored a cross-functional development team, ensuring project success within defined timeframes.
- Implemented advanced machine learning algorithms for natural language processing, enabling sentiment analysis and chatbot functionality.

- Ajax
- Cascading Style Sheets (CSS)
- LESS
- SASS
- JQuery
- Automation
- Integration
- Chatbot
- PyTorch (Machine Learning Library)
- TensorFlow
- Laminas (Formerly Zend Framework)
- Laravel
- Symfony
- MongoDB
- NoSQL
- GraphQL
- Simple Object Access Protocol (SOAP)
- Jenkins
- Docker (Containerization Software)
- Software Engineering
- Leadership
- Innovation
- User Interface
- Amazon Web Services
- Magenta
- E-Commerce
- Scrum (Software Development)
- Application Programming Interface (API)
- Inventory Management
- Team Leadership
- Computer Vision
- Development Environment
- Management
- Analytics
- Telecommunications
- Machine Learning Algorithms
- Natural Language Processing
- Machine Learning
- Algorithms
- Sentiment Analysis
- Predictive Analytics

- Spearheaded efforts to improve code quality through code reviews, unit testing, and automation, resulting in a 50% reduction in bug incidents.
- Collaborated with cross-functional teams to deliver complex projects on time and within budget, receiving recognition for outstanding teamwork.
- Implemented caching strategies and database optimization techniques, resulting in significantly reduced page load times and improved user experience.
- Contributed to open-source projects and actively participated in the developer community, promoting knowledge sharing and best practices.
- Resolved critical performance issues, improving app responsiveness and load times, resulting in a 20% increase in user retention.
- Conducted code reviews, achieved 100% coverage with unit testing, and enforced coding standards to maintain high code quality.

DIGITAL MARKETING CONSULTANT

DMB WEB | SAN DIEGO, CA | 2008 - PRESENT

As a small business marketing consultant, I provided expert digital marketing services tailored to clients across diverse industries.

- Developed and executed digital marketing strategies that significantly increased website traffic and sales potential for clients.
- Established and enhanced brand presence through online marketing, original content creation, brand representation, and engaging social media posts.
- Managed and maintained clients' online profiles, ensuring consistent brand identity across all marketing channels.
- Set up and monitored clients' digital accounts, providing regular performance tracking and improvement recommendations.
- Implemented SMS marketing, customer management, and automated communication solutions to streamline client-customer interactions.
- Consolidated all customer engagements, including calls, texts, and chats, into a single, user-friendly app for efficient communication.
- Offered an alternative or supplementary solution to traditional phone systems, ensuring clients never missed important customer contacts.
- Specialized in creating visually stunning, growth-focused websites that effectively represented clients' brands.
- Collaborated with a team of local website designers to develop custom strategies aligned with clients' messaging and business goals.
- Designed and launched websites that stood out in the competitive online landscape and drove conversions for clients.
- Assisted clients in realigning their business plans with strategic business planning.
- Conducted comprehensive discussions to identify clients' business goals and priorities, fostering a clear focus and action plan.
- Outlined recommendations and additional strategies to optimize business performance.

JAVASCRIPT DEVELOPER

DEALER TIRE | CLEVELAND, OH | 2011 - 2013

Worked as part of a team and implemented crucial client-side features for an early-stage single-page application in Backbone.js/Node.js for a tire warehouse dealer as part of a large scrum-based agile team.

- Utilized HTML5, CSS3, JavaScript, and modern front-end frameworks (e.g., React, Angular, Vue.js) to create dynamic and interactive web experiences.
- Worked closely with back-end developers and integrated with RESTful APIs to deliver

- Recommendation Engine
- Code Review
- Scalability
- Software Architecture
- Sprint Planning
- Business Requirements
- Web Applications
- Microservices
- Reliability
- Troubleshooting (Problem Solving)
- Reduction (Complexity)
- Software Quality (SQA/SQC)
- Unit Testing
- User Feedback
- Streamlining
- Agile Software Development
- User Experience Design (UX)
- Quality Assurance

INTERESTS

Automation, Web Scraping, Online Marketing, Table Tennis

seamless user experiences.
- Developed responsive web applications and websites, ensuring cross-browser compatibility and mobile responsiveness, resulting in improved user engagement and satisfaction.
- Collaborated with UX/UI designers to implement visually appealing and intuitive interfaces, translating design concepts into functional code.
- Played a key role in developing and maintaining e-commerce websites, contributing to a 20% increase in online sales.
- Implemented CSS preprocessors (Sass and LESS) to streamline stylesheet development and maintenance, resulting in improved code maintainability.
- Collaborated in an Agile development environment, participating in daily stand-up meetings and sprint planning to ensure project alignment and timely delivery.
- Optimized website performance through efficient coding practices, image optimization, and content delivery network (CDN) integration, leading to faster page load times.
- Created and maintained documentation for front-end development processes, ensuring a smooth transition for team members and future updates.
- Conducted code reviews and provided feedback to peers, improving code quality and best practices adherence.
- Conducted A/B testing and user feedback analysis to iterate on designs and user experiences for continuous improvement.

SENIOR PHP PROGRAMMER

INFORMEDIATE | AKRON, OH | 2010 - 2011

Played a pivotal role in the design and development of an enterprise retail platform (ERP) management system, enabling seamless inventory management, order processing, and real-time reporting.

- Collaborated with cross-functional teams to gather and define business requirements, ensuring the alignment of technical solutions with organizational goals.
- Implemented scalable and performance-optimized software architecture, leading to a 30% increase in system efficiency and response times. Developed custom modules and features for the ERP system, including automated inventory replenishment and predictive analytics, resulting in substantial time and cost savings.
- Assisted in designing a user-friendly dashboard for real-time analytics and reporting, enhancing decision-making for retail clients.
- Developed RESTful APIs for integration with third-party retail platforms, enhancing data exchange and streamlining operations.
- Participated in Agile development methodologies and contributed to sprint planning and daily stand-up meetings to ensure project alignment and timely delivery.
- Conducted regular code reviews, unit testing, and quality assurance to maintain a high standard of software quality and reliability. Resolved critical system issues, improving overall stability and uptime, while ensuring uninterrupted business operations.
- Conducted extensive testing and troubleshooting, addressing issues to optimize system performance and data accuracy.
